How things work

The egg parachute challenge- Create a parachute with a cup shaped bottom fit to hold an egg. Drop it from a surface and see if the egg cracks. Talk to your child about why it slowed down, e.g. the bag is catching air. Write down the children's following thoughts:

What I thought would happen before:

What happened:

Why it happened:

Stick a picture of them doing the experiment on the back

To support your child with this- create it with your child, encouraging them to use the Sellotape, scissors etc. Ask them questions throughout the experiment about what they think is going to happen.

Please encourage your child to complete this homework independently. Please also state any support given in this box:

Thank you
